BiCAT® 3228

BiCAT® 3228 is a polyurethane catalyst utilized for polyurethane synthesis and crosslinking. It promotes lower reactivity and provides pot life extension in two-component systems. BiCAT® 3228 catalyzes a variety of crosslinking reactions.

Technical Specifications

Zinc	21.7 - 22.3%
Nonvolatiles	94% min.
Viscosity (Gardner) @ 25°C	Z-3 max.
Specific Gravity @ 25/25°C	1.12 - 1.22

Product Number

1362C

Description:

clear liquid

Application:

POLYURETHANES

Packaging:

200KG - 55 gallon steel closed head drum

Chemical Formula:

Manufactured under ISO 9001 registered quality management systems.

4900 Beach Street, Norwood OH 45212 • P:513-731-1110 • www.shepchem.com
