Bismuth Octoate, 28% MSF

Bismuth Octoate is commonly used as a lubricant additive and polyurethane catalyst. It is also used in the pigments and ceramics industries and for other unique specialty chemical requirements.

Technical Specifications

Bismuth	27.7 - 28.3%
Viscosity (Brookfield) @ 25°C	30 poise max.
Color (Gardner)	8 max.
Nonvolatiles (3 hrs @ 105°)	85% min
Specific Gravity @ 25/25°C	1.28 - 1.34

Product Number

1376

Description:

brown colored liquid with a slight hydrocarbon odor

Application:

LUBRICANT

Packaging:

550 lb - 55 gallon steel closed head drum

Chemical Formula:

$\text{Bi}(\text{C}_8\text{H}_{16}\text{O}_2)_3$

Manufactured under ISO 9001 registered quality management systems.

4900 Beach Street, Norwood OH 45212 • P:513-731-1110 • www.shepchem.com
